

Handle

Wiha ComfortGrip, the comfortable multi-component T-handle with soft zones for maximum working comfort.

Extra

MagicRing® of spring steel (from size 3 mm) secures all hex standard screws independently of screw material in any position. One piece blade, through the handle withstands even the highest stresses.

Application

For comfortable high torque transfer and to insert and remove screws from holes. Especially useful for loosening or tightening screws that are hard to move. Especially useful for loosening or tightening screws that are hard to move.

Blade

Chrome-vanadium steel, through hardened, chrome-plated.
