

## Product description

Screwdrivers with a special screw profile are required when repairing iPhone® devices to ensure that the device is not damaged. Wiha's PicoFinish® fine screwdriver set comprises optimum equipment for smartphone repair. In addition to standard profiles, the set also contains the special Pentalobe and Y-type profiles which Wiha developed specifically for smartphones. The set can thus be used on all Apple® iPhone® models from Version 4 to iPhone® X. Users must observe the device manufacturer's guarantee and warranty conditions when repairing smartphones. Thanks to their long, slim handles and quick-turning zone, PicoFinish® precision screwdrivers are ideal for precision mechanics, delicate and high-precision tasks in the electrical sector as well as for hobbyists and model building. Its ergonomic handle design with a soft zone makes it comfortable to use. The smooth-running rotating cap allows users to turn the screwdriver quickly and sensitively. The white printed screwdriver symbols on the rotating cap make it easier to select the right screwdriver profile.
