

Product description

Installation projects often involve pipes, nuts, as well as rounded and edged materials in a variety of dimensions. Water pump pliers offer the optimal grip for all occasions. With a 9-step detent adjustment it offers maximum variability when working in the installation area. Crushing injuries are prevented thanks to the integrated clamping protection. Double guidance based on a box joint ensures the greatest stability of the pliers. At the same time, the slim design in the head and joint area provides reliable access to the work piece, even in confined areas. The handles of the pliers are made of anti-slip plastic and offer users a strong grip, even in oily or wet work situations. What is more, the ergonomically shaped pliers handle ensures comfortable, fatigue-proof work. In addition, slipping off the work piece is prevented by the self-clamping on pipes and nuts, thus enabling highly comfortable work. When in use, the high-quality specially hardened teeth guarantee a reliable secure grip with long-term durability. The robust water pump pliers are dirt resistant.

Standard

DIN ISO 8976.

Material

High quality chrome vanadium molybdenum steel, tempered.

Application

For gripping and holding pipes and angular profiles as well as hexagon nuts in installations.
